Santa Anita Race Track Known for Hundred Grand

To say that Santa Anita \$100,000 event exclusively for Park is a "grand" race track 4-year-olds, the Maturity, now would be only fractionally known as the Charles H. correct. Santa Anita is a Strub; and the first such "hundred grand" race track event run on the turf, the San Juan Capistrano.

The San Juan Capistrano, which annually brings down the curtain at Santa Anita in March, is today worth \$125,000 and there are no entry fees; it is run as an invitation event and thus insures a field of the best available horses in training.

In 1956 the San Juan Capistrano wrote an indelible page in the memory book of all enthusiasts of the Thoroughbred when John Longden, on the Canadian star George Royale, made it his 6,032nd victory and his 32,402 and final ride down the home-stretch.

Santa Anita was also the scene of the first 3-year-old race with \$100,000 added, The Santa Anita Derby; the first

Lakers Open Second Half Against 'Frisco Tonight

With 41 games behind them, the Los Angeles Lakers open the second half of their 81-game 1966-67 NBA schedule tonight by entertaining the powerful San Francisco Warriors at 8:30 at the Sports Arena.

Bill Sharman's Warriors, comfortably atop the Western Division standings throughout the first half of the sea-

son, have posted five straight wins over the Lakers so far this year.

Fred Schaus and crew, coming off their best win streak of the season prior to the All-Star break, intend to reverse matters tonight and continue the move upward in the standings in defense of their Western Division title.

You can hear three radio programs for what it cost you to hear two in 1939.

The price of electricity is less today. About a third less than it was 28 years ago.*

Then how come your electric bill isn't lower today? You're using a lot more electricity. Would you believe that a typical home uses electricity 40 different ways? It's true.

Of course, the fact that many Edison shareholder-owners are customers as well provides us with added

incentive. We have to do our level best to keep electricity abundant and low in cost. The "boss" is all around us.

Besides, we realize how many things you do that depend on electricity.

Like listening to your favorite D-J on the radio.

*The average cost of a kilowatt-hour of electricity to Edison's residential customers today is 34.4% lower than in 1939.
